Dr Freya Hildebrand

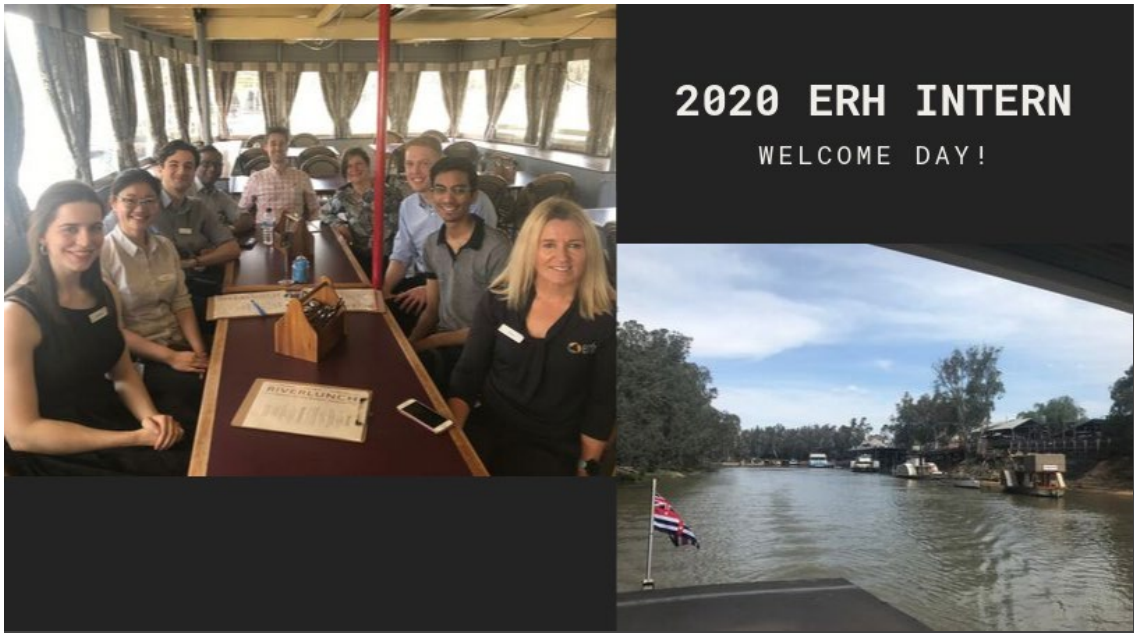
Respiratory Illnesses and Asthma

National Standard in Focus - September

The Preventing and Controlling Healthcare-Associated Infection Standard aims to improve infection prevention and control measures to help prevent infections, and the spread of antimicrobial resistance through the appropriate prescribing and use of antimicrobials.

Graduate Interviews for 2020

Jodie, Janine and the Loddon Mallee Clinical Nurse Educators conducted a series of interviews recently in preparation for 2020 graduate placements - a marathon effort! These included applicants for the Northern Rivers Graduate Nurse Program, the ERH Graduate Nurse program and the Registered Nurse/Midwife Graduate program. The applicants were of very high quality, making the decision process all the more competitive. Look out for our graduates commencing late January next year.



The ERH medical support team welcomed our new interns recently with an orientation day and team building activities on board the Pride of the Murray. We look forward to Georgia Formosa, Angela Wu, Matthew Stendell, Andrew White and Christopher Cunningham commencing in January 2020.

Recent Graduate Professional Development Day

16 graduate nurses participated in a professional development day in late September, the focus of this day was on ECG's, stroke information and wounds along with nursing and midiwifery health. This was one of eight graduate pd days available to our ERH and Northern Rivers Grads in 2019, others include four recommended days 'Health and wellbeing', 'Blood management , family violence, voluntary assisted dying and communication', 'Recognition and management of the deteriorating patient (upcoming)' and four days in which the grad can choose themselves!
